Section II

Historical Rates as of June 30, 2026

Despite fixed income market volatility and a backdrop of elevated interest rates, stable value crediting rates have continued to deliver positive total returns to participants. Blended yields continue to trend higher as stable value crediting rates reset to gradually reflect current market rates.

1: Federal Funds Effective Rate sourced from the Federal Reserve. Rates are not annualized. 2: Blended yield is after all fees including the current maximum investment management fee of 0.20% which may be charged by Galliard for management of a client's account. From April 1, 2017, to June 30, 2020, Galliard's maximum fee was 0.35%. Historical amounts reflect these fee deductions on their respective dates.

Returns shown are before investment management fees, with the exception of Liquidity Buffer which is net of all fund fees. 1: Prior to June 1, 2023, returns are linked to Dodge & Cox MetLife commingled Fund.

2: Bloomberg U.S. Intermediate Aggregate Bond Index. Prior to June 1, 2018 benchmark was Bloomberg U.S. 1-3 Year Government/Credit Bond Index.

Past performance is not an indication of how the investment will perform in the future. FOR INSTITUTIONAL INVESTOR USE ONLY.

Performance Commentary – Excess Return

Galliard Short (+20 Q2 2026)

- Overweight to securitized spread sectors continued to drive outperformance
- Curve positioning also added modestly to returns
- There were no material detractors over the quarter

Galliard Intermediate (+7 Q2 2026)

- Overweight allocation to CMBS, ABS, and Corporates proved particularly helpful
- Security selection in Corporates and CMBS detracted
- Curve positioning was modestly beneficial

Dodge & Cox (+14 Q2 2026)

- The overweight to Corporates contributed positively to relative performance while security selection in the sector detracted
- Security selection in Agency MBS detracted from relative performance
- While the neutral duration profile did not significantly impact relative performance, yield curve positioning proved beneficial over the quarter

Income Research + Management (+16 Q2 2026)

- The overweight to Corporates added to relative performance whereas security selection in the sector detracted
- The out-of-benchmark allocation to CMBS added marginally
- Duration and yield curve positioning were also beneficial

Payden & Rygel (+20 Q2 2026)

- The overweight to Corporates, ABS, and CMBS contributed positively to relative performance
- Security selection within Corporates also had a positive impact on relative performance
- Curve positioning was also beneficial

PGIM (+11 Q2 2026)

- The portfolio's overweight to spread sectors was the primary driver of outperformance over the quarter
- The overweight to CMBS and security selection within the sector added to relative performance
- Security selection within Corporates marginally detracted over the quarter

TCW (-10 Q2 2026)

- A long benchmark-relative duration bias and yield curve positioning detracted from relative performance over the quarter
- The underweight to Corporates detracted from relative performance while security selection in the sector was marginally beneficial
- The out-of-benchmark allocation to Agency MBS and CMBS was additive

1: Linked Benchmark: Bloomberg U.S. Intermediate Aggregate Bond Index. Prior to June 1, 2018 benchmark was Bloomberg U.S. 1-3 Year Government/Credit Bond Index. 2: The Weighted Average Quality of the portfolio has NOT been assessed by a nationally recognized statistical rating organization. The Weighted Average Quality shown represents an average quality of the individual holdings' Composite Ratings, as rated by S&P, Moody's and Fitch. 3: Market value. Total % of portfolio may not add due to rounding. The external managers provide portfolio holdings and the securities are classified using Galliard's analytics methodology for comparability across managers. 4: Returns for periods of less than one year are not annualized. 5: Performance inception: July 1, 2009. 6: May not add due to rounding.
